DINESH BOINI

Hyderabad | +91 70957 41043 | dineshboini2003@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer and Data Scientist with a robust foundation in Data Engineering and Generative AI. Experienced in developing end-to-end machine learning pipelines, Retrieval-Augmented Generation (RAG) systems, and scalable data warehouses. Proficient in Python, SQL, LLMs, LangGraph, and BI tools. Passionate about building scalable AI-driven solutions and driving data-informed business decisions.

TECHNICAL SKILLS

Languages & Databases:	Python, SQL (MySQL)
AI & ML:	LangGraph, LangChain, RAG, LLMs, Vector Databases (FAISS), Transformers, Embeddings, Machine Learning (Regression, Classification, Clustering), NLP, Deep Learning (CNN, RNN, LSTM)
Data Engineering:	ETL Pipelines, Data Wrangling, Feature Engineering, Data Warehousing (Star Schema), SQL Optimization
Data Analysis & BI:	Pandas, NumPy, Power BI, Tableau, Streamlit, EDA, Statistical Analysis
Tools & Platforms:	Git/GitHub, AWS, Google Colab, Jupyter Notebook

PROJECTS

RAG-Powered AI Chatbot | LangGraph, Python, FAISS, Streamlit | *April 2026 – June 2026*

• Developed a RAG chatbot for context-aware document answering using LangGraph, LangChain, and FAISS vector storage.
• Implemented a multi-agent tool-calling architecture enabling dynamic execution of web search, data retrieval, and calculations.
• Designed a stateful system with SQLite checkpointing for persistent chat history and seamless recovery.

Data Warehouse & BI Reporting | MySQL, ETL, Star Schema, SQL Optimization | *February 2026 – March 2026*

• Architected a centralized data warehouse integrating structured sources to enable efficient KPI tracking.
• Engineered ETL pipelines processing 50,000+ records into optimized star schema data models.
• Applied indexing and query optimization, reducing execution time by 40%.

Resource Crisis Prediction System | Random Forest, LSTM, Streamlit | *March 2026 – April 2026*

• Built an ML pipeline processing 77,000+ records; optimized a Random Forest model (R-squared: 0.69) for risk prediction.
• Implemented an LSTM model on time-series data to improve predictive robustness for resource allocation.

Global Job Market Analysis | Python, Power BI | *December 2025 – January 2026*

• Analyzed 1,000+ job ads globally; designed an interactive Power BI dashboard visualizing hiring patterns and salary disparities.

EDUCATION

Malla Reddy University, Hyderabad	B. Tech in Computer Science and Engineering | CGPA: 7.74/10	2021–2025
Sri Chaitanya Junior College, Hyderabad	MPC | Marks: 932/1000	2019–2021

CERTIFICATIONS

Data Science with GenAI Course	Medha Edu Tech (Nov 2025 – June 2026)
Deep Learning	NPTEL (July 2024)
Industry Simulations	Deloitte Australia (Data Analytics), Tata (GenAI Powered Data Analytics) — Forage (April 2026)
